

Micronic Screw Cap Recapper CS500, CS510, and CS520

Developed in conjunction with several leading laboratories, the Screw Cap Recappers CS500, CS510 and CS520 offer the ability to cap, decap or recap a row of tubes in less than 5 seconds and a whole rack in only 1 minute. This is 10 times faster than by hand and improves productivity.

- Cost-effective solution
- Each screw cap is reproducibly tightened securely and uniformly for an optimal sealing performance
- Cycle time: caps a row of 8, 6 or 4 tubes in 4 seconds and a whole rack of 96, 48 or 24 tubes within 45-60 seconds
- No need for battery recharging, available to use once plugged in
- Ergonomic solution for left and right-handed use
- Caps can be easily discarded using the large ejection handle
- Small footprint for bench-top use
- 3-year warranty!

Micronic received a good industrial design award (GIO award) for the innovative design of the recappers. The award indicates that the recappers are original, functional, ergonomic, designed with respect for the environment and add value to end-users.
