### Superior rack features

- Based on the Society for Laboratory Automations and Screening (ANSI / SLAS) standards for storage racks
- Automation compatible
- Extremely strong design which minimizes deformation due to temperature changes
- Made from Polycarbonate which has excellent properties for low temperature
- Autoclavable
- Novel locking system for cryogenic storage: "icebreaker" mechanism
- Highly transparent cover enables easy visual checking of the enclosed samples
- Standard available with laser-etched 1D rack barcode
- Unique laser-etched Alphanumeric coding on top of the rack
- Rack orientation marks on bottom and side
- Twist-Lock design prevents tubes from turning during screw (de)capping
- Class 7 clean room production
- RNase/DNase and Pyrogen free

30 years of experience  
in traceable sample  
storage
